EXPERIENCE

Founding Engineer

April 2026 – Present

Kyaaloon.in

Remote

- Architected a zone-aware fulfillment engine that dynamically resolves user coordinates to pincode-specific warehouses via reverse geocoding
- Designed atomic database transactions in Django to ensure data integrity between the cart engine, inventory validation, and the financial ledger
- Integrated Razorpay for an end-to-end checkout pipeline, utilizing HMAC-SHA256 cryptographically verified webhooks to ensure untampered payment capture
- Deployed a production-ready WSGI pipeline via Railway and Gunicorn, fortified behind a Cloudflare WAF to mitigate edge threats and DDoS attacks

PROJECTS

CarbonManthan | *Django, Python* | [GitHub](#) | **Live**

Sep 2025

- Developed a backend MVP for a carbon credit trading platform.
- Engineered secure transaction flows and implemented RBAC to manage isolated routing for Buyers, Sellers, and Admins.
- Deployed the backend on Google App Engine with Cloud SQL (PostgreSQL).

Linux Workstation Configuration | *Bash, Hyprland, Lua* | [GitHub](#)

Nov 2025 – Present

- Maintained a custom, highly reproducible Fedora/Wayland environment via Git.
- Scripted automated system provisioning workflows in Bash to eliminate manual setup and reduce configuration friction.
- Configured a personalized Neovim IDE using Lua, integrating native LSPs and formatters.

Personal Website | *Hugo, Go Templates, Cloudflare Pages* | [GitHub](#) | **Live**

2026 – Present

- Achieved a 300ms average load time and perfect Core Web Vitals scores (LCP, INP, CLS) through a zero-JavaScript frontend architecture.
- Deployed via Cloudflare Pages using automated CI/CD pipelines, ensuring high availability and sub-second global content delivery at the Edge.
- Engineered modular components using Go template logic to create reusable partials for dynamic tag clouds and automated internal linking systems.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, Bash, HTML/CSS

Frameworks & Databases: Django, Django Ninja, PostgreSQL (Supabase), Tailwind CSS

Tools & Infrastructure: Git, Linux, Neovim, Cloudflare Pages, Railway, Google Cloud

Core Competencies: Data Structures & Algorithms, Backend Architecture, Competitive Programming

ACHIEVEMENTS

Competitive Programming: Max Rating **1575** (LeetCode), **1283** (CodeChef). Maintained high consistency with **478** active days.

Problem Solving: Solved **480+** problems across platforms (437+ DSA). Leveraged Python for rapid algorithmic logic and C/C++ for fundamentals.

Hackathons: Ranked **4th** in Juethack 2025 (Internal University Hackathon).

Smart India Hackathon (SIH): Participated in internal rounds with project CarbonManthan (2025).

EDUCATION

Jaypee University of Engineering & Technology

Guna, MP

Bachelor of Technology in Computer Science

Aug. 2024 – June 2028 (Expected)

- **CGPA:** 8.23 (Current)

Jawahar Navodaya Vidyalaya

Nagaur, Rajasthan

Senior School Certificate Examination (CBSE Class XII)

May 2023
